Final maintenance of the MIMOSA software

Maintenance of the MIMOSA software, originally initiated by the Trilateral Offices (EPO, JPO, USPTO) will be continued for one final period until end December 2020, including the final adaptation to Microsoft Windows 10.

This termination of maintenance applies to all MIMOSA software components including:

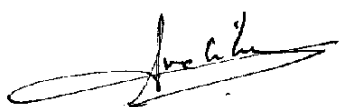

- MIMOSA authoring package (all components for data processing)
- MIMOBATCH
- MIMOVIEWER
- MIMOSA retrieval user interface

Should your office still use MIMOSA Software products and require further maintenance services relating to the MIMOSA products, require possible further MIMOSA developments, or simply require a new MIMOSA key for the installation of a new MIMOSA authoring package after December 2020, you are advised to directly contact an external contractor of your choice. For information, so far, the company Jouve was responsible for the software maintenance. The details of the Jouve contact person are given below.

Austria

We trust that you will find these arrangements to your satisfaction. Should you require further information concerning any of the EPO's services, please do not hesitate to contact the EPO at your earliest convenience.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Pierre Avédikian', with a long horizontal flourish extending to the right.
